

CONTINUOUS EFFECTIVE SEALING

Support & Seal Bed

Benetech's Support & Seal Bed is designed to fully support the conveyor belt in areas outside of impact zones, particularly along the edges of the belt where it is most essential.

The bed ensures a continuous effective sealing between the belt and skirting to eliminate material spillage and prevent belt sag, thereby increasing belt life and condition.

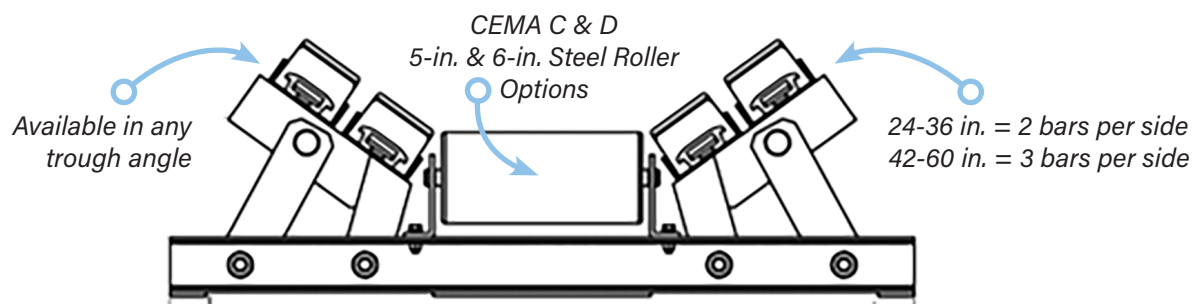

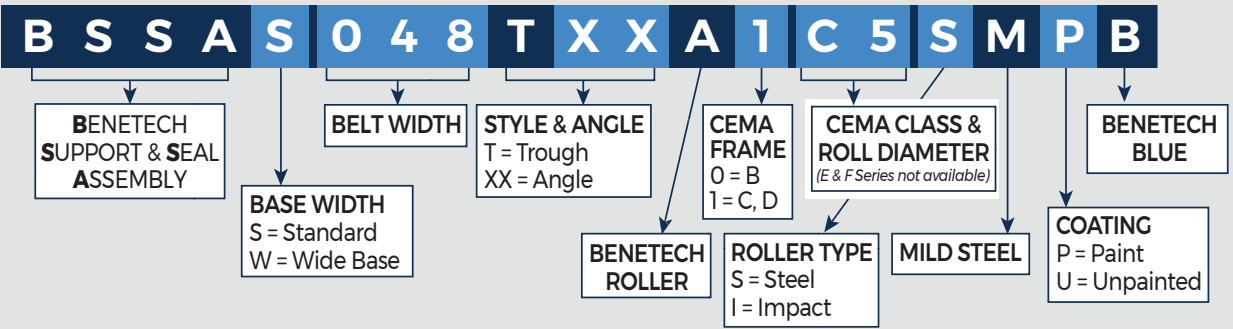

Support & Seal Beds can be used in conjunction with Benetech's Warrior Impact Beds, Warrior Roll & Guide assemblies, and Simple Slide idlers throughout the load zone for complete transfer point sealing.

FEATURES & BENEFITS

- Light to medium duty outside of impact area
- Improves conveyor belt condition and lifespan
- 4-ft. assemblies available for 24-60 in. belt widths
- Available with steel or impact style CEMA C or D rollers, in 5 in. or 6-in. diameters
- 2 bars/side for belts 24-36 in.
- 3 bars/side for belts 42-60 in.
- Available in any trough angle
